"Reading for pleasure has been associated not only with increases in reading attainment but also with writing ability, text comprehension, grammar, breadth of vocabulary, attitudes, self-confidence as a reader, pleasure in reading in later life, general knowledge, a better understanding of other cultures, community participation, a greater insight into human nature and decision-making." (Clark & Rumbold, 2006; Howard, 2011; Wigfield & Guthrie, 1997).
